Noise dB Under 70 (Based on our test)		dB Under 70 (Based on our test)					

Replenishment) This product is a stop category "0". Corresponds to PL = d.

^{*1)} The payload includes loads of tasks, weight of tools, and so. Allowable torque exceeding error and overload error and overl even within specification depending on the posture, speed, acceleration/deceleration time, direction of operation, etc. Adjust motion factors and variables then.

^{*2)} Refer to "Coordinate Systems" for information on definitions of axes. Depending upon arm postures, unreachable points exist even within the work envelop.

^{*3)} Value is for a reference.

^{*4)} In case of the maximum load at the maximum speed.

^{*5)} Depends on operating conditions, such as acceleration and deceleration.
*6) Using screws of at least 30 mm long is recommended

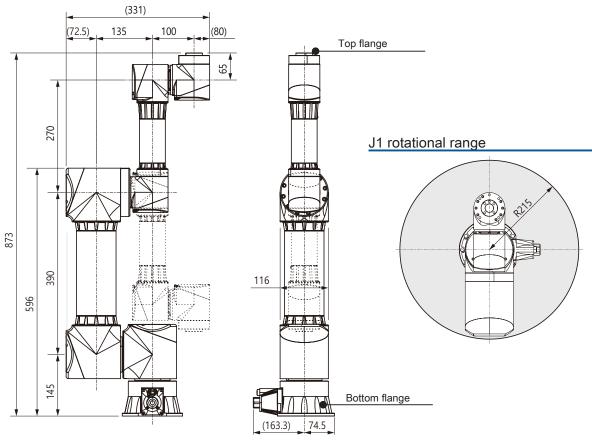

Manipulator Dimensions

ZRA-0503P Arm Length: 660 mm Pass

Pass Through Type

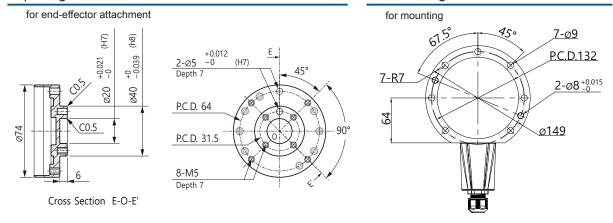

Not to Scale

(mm)

Top flange

Bottom flange

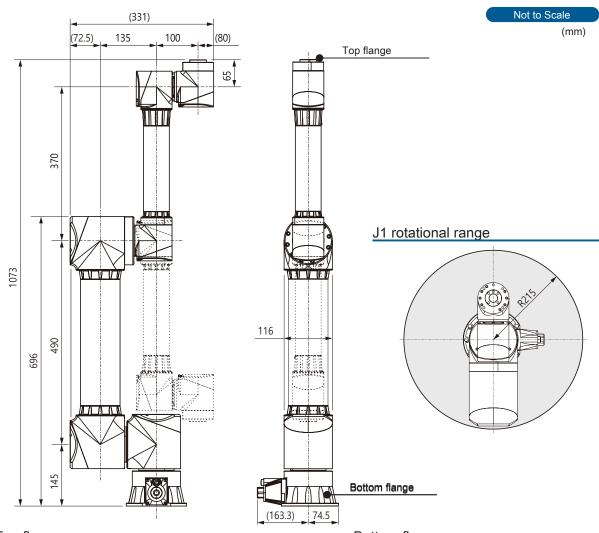

Mounting bottom flange

To mount bottom flange, Using M8 hex sockethead cap screws of at least 30 mm long is recommended. The recommended tightening torque is 22 Nm.

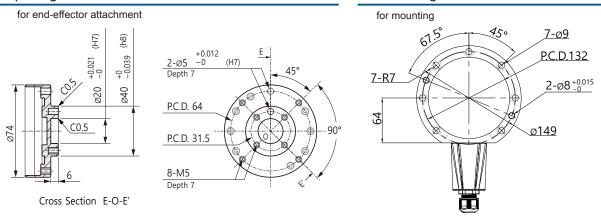

ZRA-0515P Arm Length: 860 mm

Pass Through Type

Top flange

Bottom flange

Mounting bottom flange

To mount bottom flange, Using M8 hex sockethead cap screws of at least 30 mm long is recommended. The recommended tightening torque is 22 Nm.

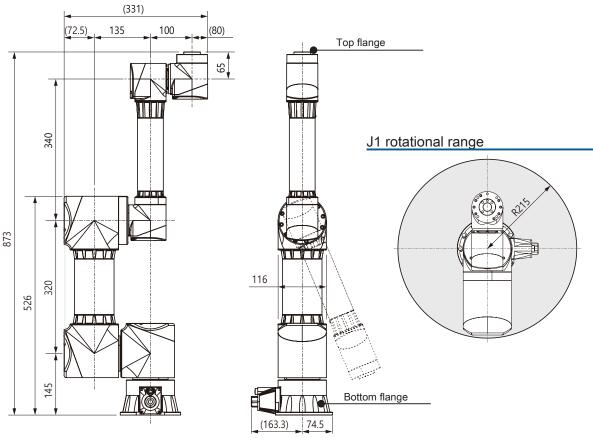

ZRA-0502N

Arm Length: 660 mm

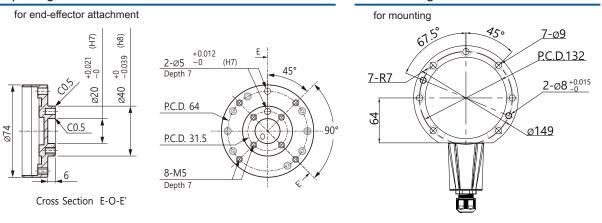

Turn Around Motion Type

Not to Scale (mm)

Top flange

Bottom flange

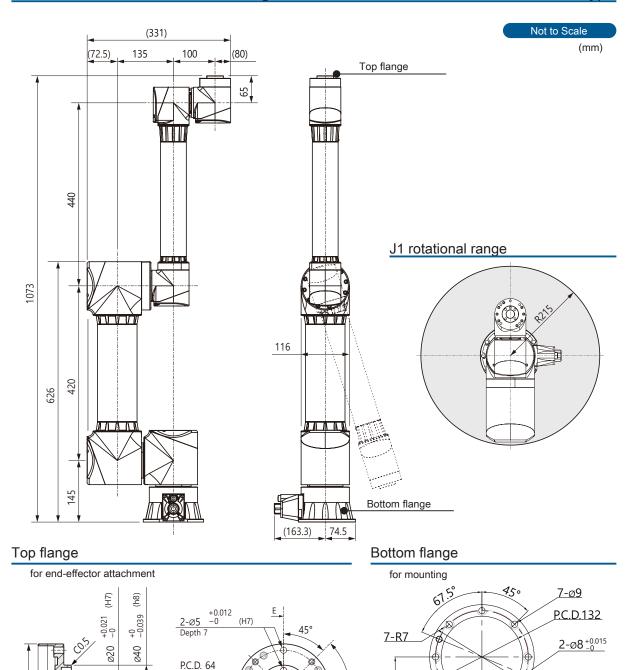

Mounting bottom flange

To mount bottom flange, Using M8 hex sockethead cap screws of at least 30 mm long is recommended. The recommended tightening torque is 22 Nm.

<u>ø149</u>

ZRA-0514N Arm Length: 860 mm Turn Around Motion Type

Mounting bottom flange

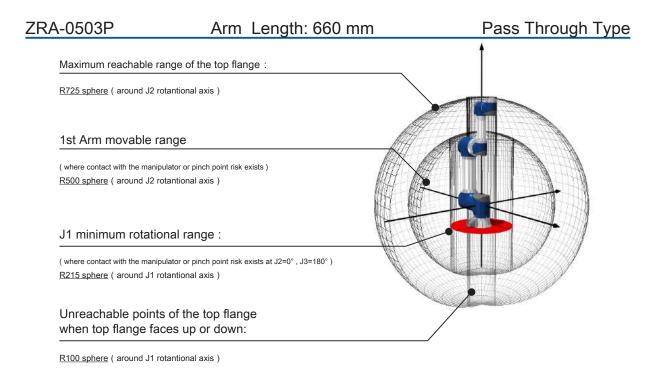

Cross Section E-O-E'

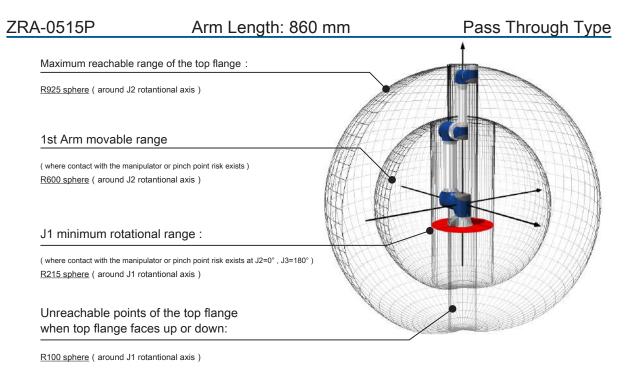

To mount bottom flange, Using M8 hex sockethead cap screws of at least 30 mm long is recommended. The recommended tightening torque is 22 Nm.

P.C.D. 31.5

Range of Movement

Replenishment

Depending upon arm postures, unreachable points exist even within the work envelop.

Unreachable points of the top flange when top flange faces up or down:

Unreachable points of the top flange when top flange faces up or down:

R100 sphere (around J1 rotantional axis)

R100 sphere (around J1 rotantional axis)

Arm Length: 660 mm Turn Around Motion Type Maximum reachable range of the top flange: R725 sphere (around J2 rotantional axis) 1st Arm movable range (where contact with the manipulator or pinch point risk exists) R435 sphere (around J2 rotantional axis) J1 minimum rotational range: (where contact with the manipulator or pinch point risk exists at J2=0°, J3=180°) R215 sphere (around J1 rotantional axis)

Maximum reachable range of the top flange:

R925 sphere (around J2 rotantional axis)

1st Arm movable range

(where contact with the manipulator or pinch point risk exists)

R520 sphere (around J2 rotantional axis)

J1 minimum rotational range:

(where contact with the manipulator or pinch point risk exists at J2=0°, J3=180°)

R215 sphere (around J1 rotantional axis)

Replenishment

Depending upon arm postures, unreachable points exist even within the work envelop.

Recommended End-effector Structure

Λ

Caution

When designing an end-effector which will be attached to the tool center point, thoroughly validate manipulator postures and motion ranges. See below for examples.

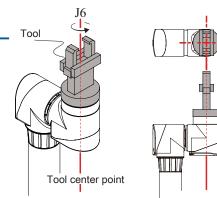

Example 1

Recommended

The rotational axis of Rz and the central axis of the tool are coaxial.

Note that the longer the distance between the tool center point and the end of the tool is, the larger the payload to the manipulator becomes, which may result in vibrations or slower motion speed.

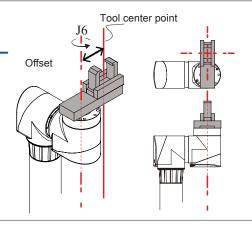

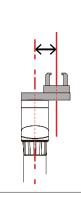

Example 2

Not Recommended

Because an offset exists between the central axis of the tool and the Rz rotational axis, the robot may become unable to handle a workpiece.

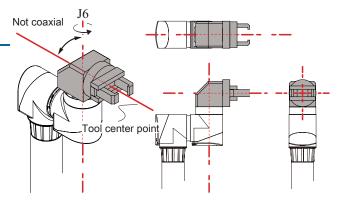

Example 3

Not Recommended

Because the central axis of the tool and the Rz rotational axis are not coaxial, the robot may become unable to handle a work piece.

Controller Specifications

Item		ZC1000	ZC1001	Note	
Compatible Manipulator		ZERO series		In case using Teaching Pendant(ZP1000) ZC1001 is necessary	
	Dimensions	(See a dimension drawing)		The overhang is not included	
	Weight	5 kg		_	
	Number of Control Axes	6 axes		-	
General Specifications	Programming Method	Off-line programming with a PC		Application programs are transferred with TFP and executed.	
	Programming language	Python		Use the special libraries for the robot operation	
	Storage Memory	eMMC		_	
	Teaching method	PC Jog Stick	PC Jog Stick Teaching Pendant	Monitoring, storing and controlling data via http with a web browser	
Display	7-segment display panel	3 digits		_	
function	Status LED indicators	3 lamps		-	
	Manipulator Connector	1 Port		_	
	Input	16 Bit		Isolated; selection of high-side or low-side	
	Output	16 Bit		Isolated; selection of high-side or low-side	
Interface (Controller)	Safety	1 Port		EMS x 2; Mode; Servo-On input Servo power monitor	
	Ethernet	2 Port		_	
	USB	2 Port		-	
	JOG Stick	1 Port		A special input device I/F for teaching	
Interface (Arm I/O)	Digital input	8 Bit		Not isolated; comparator input	
	Digital output	4 Bit		Non-isolated; high-side switch	
	Asynchronous communication	1 Ch		RS422/RS485	
	Power output	24 V		0.2 A max	
	Voltage Single-phase 100 VAC - 24		/AC - 240 VAC	-	
	Frequency	50 Hz - 60 Hz		_	
Specifications of Power	Current	2.7 A, 230 VAC / 5	4 A, 115 VAC	-	
supply ^(*)	In-rush current	75 A, 230 VAC		_	
	leakage current	5.0 mA, 240 VAC		-	
	Rated short circuit current	1,500 A		UL File No. E10480	
Grounding		Type 3 grounding or above		Grounding resistance value of 100 Ω or below	
	Rating	ISO 10218-1		Certified	
Safety	Voltage-resistance	1,500 VAC		Primary-FG, 1 minute	
	Insulation resistance	1 M Ω or above		I/P-FG 500VDC / 25°C / 70%RH	
EMC		EN61000-6-2:2005 EN55011 : 2009+A		Heavy industrial level	

^{*)} Voltage variation should be within input voltage range

Be no power outage more than 20 ms.

Gain sufficient power including in-rush current

Use fuses with rated current: 8A, rated breaking capacity: AC250 V / 1,500A

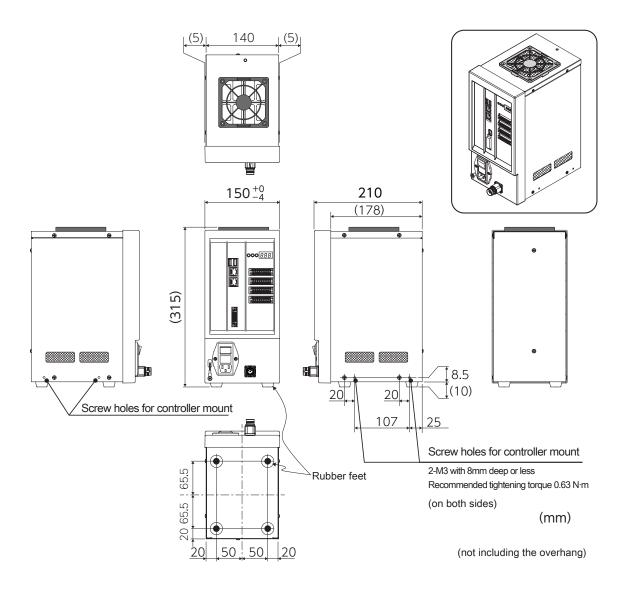

The specification items and their contents described in this document are general information. For more details, please refer to a copy of the document "SPECIFICATIONS" included in the product.

Controller Dimensions

CAUTION

When designing a metal fitting, make it so that the cover fixing screws are 20 mm away from the controller mount holes and also the air inlets will not be blocked.

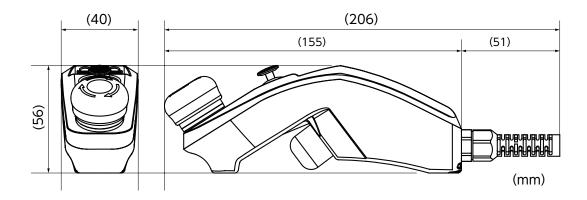

JOG Stick Specifications

	Item	Specification	Remark
General Specifications	Model	ZJ1000	_
	Dimensions	H56 mm × D155 mm × W40 mm	Not including a cable
	Weight	600 g or less	_
	Frame material	ABS resin	Color: Yellow / Black
	Power supply volatage	DC24 V ± 10%	_
	Power consumption	5 W or less	_
	Cable length	5 m	_
